Experience Tech Tools

Unitron TrueFit fitting software seamlessly integrates our suite of Experience Tech Tools into your fitting sessions, enabling you to engage clients as collaborative partners in their hearing care journey.

Unitron TrueFit software offers convenient access to:

First Fit | FLEX:TRIAL™ | Log It All | Ratings | Success Check | Remote Adjust | FLEX:UPGRADE™

Flexible fittings

Unitron TrueFit software gives you the flexibility to fit your clients the way you choose. Follow the First Fit workflow for a fast and convenient baseline fit to make a great first impression. And with Remote Adjust, you can make fine-tuning adjustments informed by their everyday listening environments to support your clients, wherever they are.

unitron Love the experience

Easy comparisons

Unitron TrueFit software lets you know exactly what your client is getting at each technology level by highlighting the added features, along with convenient feature diagrams and descriptions. Compare technology levels quickly and easily and use FLEX:TRIAL to help your clients make an informed decision about which level best meets their needs. Should their needs change, you can upgrade their devices using FLEX:UPGRADE right from the fitting software.

Data-driven Insights

Go beyond standard data logging with data-driven insights. Log It All shares real-life data to help you and your clients make objective, data-driven decisions about their hearing technology. View Ratings from your clients that are supported by contextual information. Monitor their successes with Success Check, which gives you access to these insights between appointments and will even alert you if something doesn't look quite right.

View client adjustments

Easily view volume changes in each listening environment as well as any equalizer adjustments made via the Remote Plus app in the Unitron TrueFit software. Access to client adjustments help you better understand your client's needs and preferences.

86% of customers believe that Unitron TrueFit software provides helpful insights that support a better outcome for clients.*

Additional Unitron TrueFit software highlights

> **Automatic Adaptation Manager** helps your clients adjust to their hearing aids over time

> **Fitting advice** supports you in finding solutions if your clients are having trouble

> **Tap control training and sensitivity settings** makes learning how to control their hearing aids a breeze

> **Automatic REM** guides you through the target matching process and reduces the opportunities for human error

> A personalized **Getting Started Guide** starts your client off on the right foot with simple instructions that reflects the configuration of their hearing aids

Love the experience.

Unitron makes life vibrant with amazing hearing solutions designed to make the experience easy. Because everyone deserves to **Love the experience**.™
