Unitron TrueFit
fitting software

87% of customers agree that Unitron TrueFit software is easy to use.*

Unitron TrueFit™ software is designed to be intuitive and easy to use, with data driven insights to help you support your patients through their hearing care journey.

From efficient first fits in as few as four clicks, to easy technology upgrades, and everything in between, Unitron TrueFit software is here to support you every step of the way.

84% of customers agree that Unitron TrueFit fitting software facilitates quick and easy adaptation to amplification for new wearers.*

What's new with Unitron TrueFit 5.9

> Customized Coach workflows
> Faster FLEX:UPGRADE™ technology level changes
> Faster FLEX:TRIAL™ technology level changes
> EasyGuard™ Vented dome support
> Automatic REM support for higher versions and new systems

Support for Smile:
> Insera™ S-R
> Insera™ S-10 NW O

Experience Tech Tools

Unitron TrueFit fitting software seamlessly integrates our suite of Experience Tech Tools into your fitting sessions, enabling you to engage patients as collaborative partners in their hearing care journey.

Unitron TrueFit software offers convenient access to:
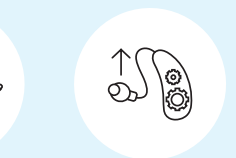

| First Fit	FLEX:TRIAL™	Log It All	Coach	Ratings	Success Check	Remote Adjust	FLEX:UPGRADE™

Flexible fittings

Unitron TrueFit software gives you the flexibility to fit your patients the way you choose. Follow the First Fit workflow for a fast and convenient baseline fit to make a great first impression. And with Remote Adjust, you can make fine-tuning adjustments informed by their everyday listening environments to support your patients, wherever they are.
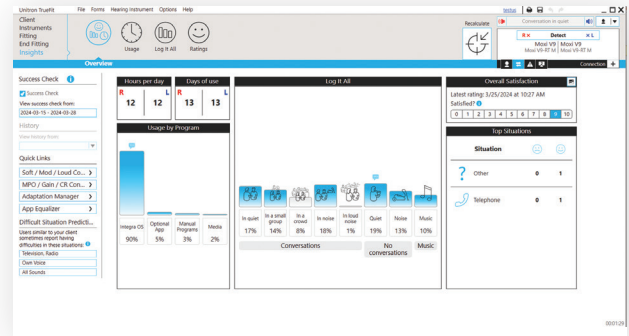

Easy comparisons

Unitron TrueFit software lets you know exactly what your patient is getting at each technology level by highlighting the added features, along with convenient feature diagrams and descriptions. Compare technology levels quickly and easily and use FLEX:TRIAL to help your patients make an informed decision about which level best meets their needs. Should their needs change, you can upgrade their devices using FLEX:UPGRADE right from the fitting software.

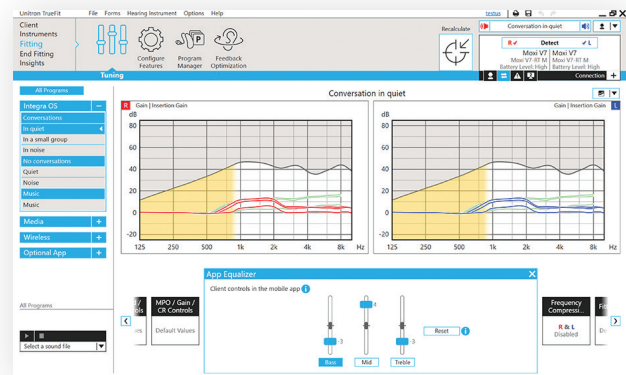

Data-driven Insights

Go beyond standard data logging with data-driven insights. Log It All shares real-life data to help you and your patients make objective, data-driven decisions about their hearing technology. View Ratings from your patients that are supported by contextual information. Monitor their successes with Success Check, which gives you access to these insights between appointments and will even alert you if something doesn't look quite right.

View patient adjustments

Easily view volume changes in each listening environment as well as any equalizer adjustments made via the Remote Plus app in the Unitron TrueFit software. Access to patient adjustments help you better understand your patient's needs and preferences.

86%
of customers believe that Unitron TrueFit software provides helpful insights that support a better outcome for patients.*

## Additional Unitron TrueFit software highlights

> **Automatic Adaptation Manager** helps your patients adjust to their hearing aids over time

> **Fitting advice** supports you in finding solutions if your patients are having trouble

> **Tap control training and sensitivity settings** makes learning how to control their hearing aids a breeze

> **Automatic REM** guides you through the target matching process and reduces the opportunities for human error

> A personalized **Getting Started Guide** starts your patient off on the right foot with simple instructions that reflects the configuration of their hearing aids

---

Love the experience.
