

#### Let your conversation take center stage

Use this elegant wireless hearing solution to enhance your conversations. Speech enhancement adjusts automatically based on your surroundings. Just put them in whenever you need them — and take them out when you don't.

## About the Sennheiser brand

We live audio. We breathe audio. Now and always. This passion is what drives us to develop audio solutions that make a real difference for our customers. Shaping the future of the audio world and creating unique sound experiences – that's what the Sennheiser brand has represented for more than 75 years.

The business with consumer electronics products such as headphones, soundbars and voice-optimised hearable technology is operated by Sonova Holding AG under licence from Sennheiser.

# Enjoy clearer conversations with advanced speech enhancement.

Let speech enhancement match your surroundings with automatic scene detection

Block out noise, relax, and focus better with active noise cancellation

Hear more of what's around you with Ambient Awareness

Get easy setup and personalization from the companion app

Connect to any Bluetooth device including smartphones, laptops, tablets, and smart TVs

Hear clearer during calls with speech enhancement and active noise cancellation

## Earbuds that help when you need them

The roar of a bus, a barking dog, or other people talking next to you — in certain situations, it can be difficult to have a conversation. That's when ConC 400 comes in. Just wear this wireless hearing solution to cut through the noise whenever you need it. On the town, at the office, or home with family.

But don't let the convenience fool you — the technology inside is as advanced as it gets. These earbuds can even tell what kind of environment you're in and give you the right speech enhancement for your surroundings.

## You're in complete control

When background sounds make it difficult to hear what people are saying, you need more than just a volume boost. That's why ConC 400 uses active noise cancellation and beamforming to cut right through the noise. The only thing to reach your ears is clear, easy-to-understand speech.

And when you're looking for some peace and quiet, you can turn on noise cancellation. What if you want to hear more of your surroundings later? Just turn up Ambient Awareness. And when you no longer need them, simply remove the earbuds and put them back into their elegant case.

## Setup and personalization are easy in the app

In most situations, ConC 400 earbuds adjust fully automatically. All you have to do is put them in your ears. But sometimes, you want to fully control what you hear.

The intuitive companion app is available for free from the major app stores. It gives you easy, guided setup and access to all your settings in one place. Settings for Relax, Communicate, and Stream let you select how your earbuds perform according to your situation or personal preferences.

## Use with practically any Bluetooth-enabled device

Once you've connected to a device, ConC 400 intelligently adjusts to whatever content you're listening to. When language-based content like a podcast is playing, your earbuds automatically provide just the right amount of speech enhancement to make everything easy to understand.

The TV Connector is an optional adapter that lets you connect your TV set through its audio output to ConC 400. This way, you can enjoy clear TV listening with perfectly synced voices, but without disturbing anyone else in your home.

**"95% of users experience significant speech enhancement in noisy situations when using the product"\***
