# Easy to hear

## Smile from ear to ear.

Smile hearing aids enhance the sounds you want to hear and minimise the ones you don't. They automatically adjust to your environment, optimising sound settings so you can stay engaged in the conversation with less effort in the moment and less fatigue at the end of the day.<sup>1</sup>

Whether you're catching up with friends in a bustling café or chatting quietly at home, you can enjoy quiet moments, big laughs, and engaging stories.

## Effortless connectivity.

Moxi™ S-R and Insera S-R hearing aids offer easy, reliable universal connectivity<sup>2</sup> with instant compatibility for hands-free calls and smooth media streaming across all your Bluetooth®-enabled devices.

Enjoy fast and seamless switching between in-person conversations, phone calls, and streamed media—plus powerful wireless transmission that provides the freedom to walk away from your phone while staying connected and engaged.
