

You should be able to  
count on your hearing aids—  
wherever life takes you.

## Moxi™ V-RT ranked #1 in quality testing

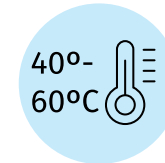

We put our Moxi V-RT hearing aids up against 3 other leading brands. All were tested for 200 hours in extreme conditions, including:

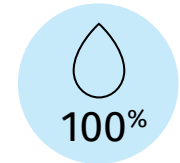

Sweat

Condensation

High  
temperatures

Relative  
humidity

Moxi V-RT came out on top with the best overall results in product quality:

**90%**  
microphone  
durability

**100%**  
battery and  
charging  
performance

**90%**  
sound  
performance  
maintained

**0**  
dead  
hearing aids

**IP68**

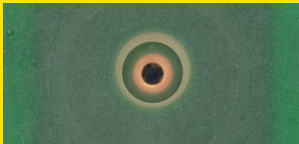

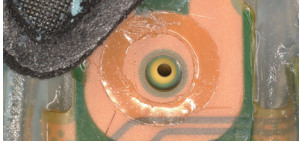

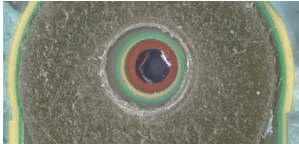

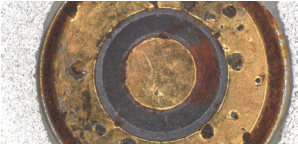

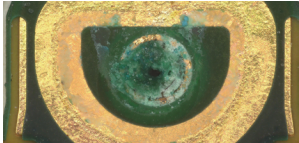

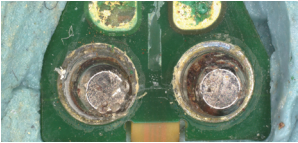

### Unitron Vivante™ hearing aids are rated IP68

What does this mean?

The IP (Ingress Protection) rating shows how well a device resists dust and water. IP68 is the highest score a hearing aid can get. But we don't stop there — Unitron hearing aids are built to go beyond the standard, so you can rely on them, day in and day out.

At Unitron, we go the extra mile to test our hearing aids in the toughest conditions. So whether you're sweating it out at the gym, caught in the rain, or facing everyday humidity, you can trust your hearing aids to keep performing.

How Moxi V-RT outperforms the rest:

	<div>Microphone</div> <div>Photographed after 140 hours of testing</div>	<div>Charging pins</div> <div>Photographed after 200 hours of testing</div>	Sound quality	Failure rate	What does this mean?
<div>Unitron Moxi V7-RT</div>	<div> 90% resistance to corrosion</div>	<div> 100% resistance to corrosion</div>	90% performance maintained	0/10 dead devices	The hearing aids can withstand harsh, long-term use
<div>Competitor A</div>	<div> 50% resistance to corrosion</div>	<div> 0% resistance to corrosion</div>	33%	2/6 dead devices	Over time, the hearing aids may lose the ability to charge due to corrosion and sound quality may be impacted
<div>Competitor B</div>	<div> 13% resistance to corrosion</div>	<div> 0% resistance to corrosion</div>	0%	1/8 dead devices	Over time, the hearing aids will likely lose the ability to charge due to corrosion, and it's likely that sound quality is impacted
<div>Competitor C</div>	<div> 0% resistance to corrosion</div>	<div> 0% resistance to corrosion</div>	0%	7/8 dead devices	Over time, the hearing aids have a higher possibility of not being able to charge due to corrosion, with the possibility of the devices not working at all

Enjoy the sounds of the good life — with quality that stands up to **real life**.
